

4-Bottle Wine Dispenser (single or dual temperature) for staff and free-serve use

The QUATTRO is an entry-level dispenser that maintains the principles of unparalleled technology and elegant design synonymous with the WineEmotion range. It is built to handle the rigors of any commercial setting, with a space-saving and compact design for back-bar, staffed or free-serve use. The integral gas option allows the operator the flexibility of moving the dispenser with minimal disruption. Recommended for wine producers or importers, or for smaller installations such as small wine shops, wine bars, clubs or perfect for use in private homes.

Key features:

30 Days Preservation

Precise Measure Control

Three Volume Measures

Single or Dual Temperature

Integral Gas Cartridge

Beautiful Bottle Display

Compact Sleek Design

2 Year Warranty

Entry Level Price

Quattro features

Models Available (3 options)	4-bottle room temperature, single temperature – for 4 red wines 4-bottle refrigerated, single temperature – for 4 white wines (or 4 red wines) 4-bottle refrigerated, dual temperature – for 2 x red & 2 x white wines
Temperature Settings	Refrigerated: from 7 to 18°C (from 45 to 65°F)
Usage	To be used by staff or for free use by customers Perfect for the home - for kitchens, home cinemas or bars
System Activation	Full control through single easy to use control panel
Preservation	30-day wine preservation with argon gas Food grade nitrogen or argon (cylinder or generator not included unless integral gas option selected)
Servings	Three pour adjustable portion control
Display	Robust and luminous flat panel display, shatter resistant
Lighting	Ambient LED system that uses static light
Gas Source	Integral Gas (refill cylinder - minimum 50 bottles) External Gas option (via external cylinder or nitrogen generator)
Bottle Lifting System	Powered by pneumatic pistons which are assisted by mechanical springs (manual operation for integrated gas option)
ISOL-Plus Technology	Patented unique design which prevents aromatic cross-contamination of wines. Independent valves ensure perfect isolation of each bottle within the dispenser
Materials	High quality stainless steel as standard
Customisation	A range of optional coloured finishes available to suit most interior decors. Special commissions also available upon request Screen printing for customising display and keypad area, can include customer logo and branding
Positioning	Freestanding or built-in For integral cartridge model, access required to top of dispenser
Condensation Drainage	External drain-line not required, dispenser has an internal condensate evaporator heater
Cooling System	Dispenser is chilled by air compressor, high quality componentry
Compressor Placing	Compressor is located at the back of the dispenser (not the side) making a compact footprint with 100% bottle display at the front
International Conformity	All products are certificated in conformity with International and European (CE) referenced regulations
Warranty	24 months manufacturer's parts warranty 12 months labour warranty, extendable to 24 months with technical support contract
